PROFILE

Web developer and BSc Information Technology student in Accra with hands-on experience building websites for clients and database-driven systems. Studying information systems security to build software that is safe as well as good-looking. Seeking a first internship to apply these skills on real-world projects.

EXPERIENCE

Freelance Web Developer | Ghana

- Built numerous websites for clients and small businesses, from a food brand to a hardware and furniture store.
- Developed database-driven systems while studying, including a multi-school management platform.
- Delivered responsive, mobile-friendly sites with animation, clear product pages and easy ordering.

Digital Team Member, Grodital | 2 years

- Served on the digital team of Grodital, an affiliate marketing platform.

SELECTED PROJECTS

Klaso - School Management System

PHP, MySQL. A platform schools pay to join, to manage student records, teachers, examinations, fees and results in one place.

Melopetite Tombrown Website

HTML, CSS, JavaScript. Premium parallax brand site for a Ghanaian porridge flour business, with product pricing and easy ordering.

Boison Trading Company Website

Business website for a hardware, cement and furniture store in Sekondi.

ClinicFlow

Java. Group clinic system for patient registration and queue management (BSIT301, UPSA).
